(54) Title: MICRO LIGHT MODULATOR ARRANGEMENT

WO 03/081315 A1

(57) Abstract: The invention relates to a micro light modulator arrangement (10) comprising at least one light transmission path (23) and at least one controllable shutter (11, 16) arranged for modulation of light transmitted via said at least one light transmission path (23), said at least a part of said light transmission path comprising a translucent solid material, and said at least a part of said light transmission path being an integral part of a substrate to which said at least one controllable shutter (11, 16) is anchored.
